HARINDER TAKHAR
MPP MISSISSAUGA-ERINDALE

My fellow Constituents,

I hope that you had a great summer and looking forward to a beautiful fall. As I have done every year, this householder focuses on key information and achievements in the area of education. It is important to share these achievements with you at this time as our children head back to their schools. I am certain you must have noticed that the schools of your children have seen stability, increased funding and delivered better outcomes and results. We are proud of these achievements and continue to work to make even more improvements.

A new campus of Sheridan College in Mississauga is under construction and a new Medical Academy at the University of Toronto's Mississauga Campus is under way to start delivering medical education to much needed medical professionals. Both of our local hospitals will become teaching hospitals and help us attract and retain qualified doctors.

As always, I enjoy hearing from you. Your feedback is important to me to carry on with my responsibilities as your Member in the Ontario Legislative. If you require assistance with provincial matters, please contact my office it will be our pleasure to serve you.

Thank you for your continued support!

Sincerely,

Harinder
